

Sprint 3 Report

Product Name: Collect

Team Name: Collective

Date: 7/23/19

Actions to stop doing:

- Communication in terms of pushing to git because there was a lot of code being overwritten due to force pushing.

Actions to start doing:

- The team should start meeting more often, because when we are meeting in person we are able to get more work done.
- The team should start separating our scrum meetings into two separate parts, first the actual scrum meeting and then problem solving meetings where we can solve problems. This will make scrum meetings more effective and still allow us to problem solve on meeting days.

Actions to keep doing:

- The team should continue having group meetings after TA meetings, because we are able to immediately implement feedback into our work.
- The team should continue the terrific work in terms of communicating changes and new implementations within the code.
- The team should continue to use different branches for development, because it allows everyone to work on their code without disturbing others' work.

Work Completed:

- Merge and polish the UI and core database.

- After the item has been paid for, I want to be able to mark that on the virtual receipt that Collect generated so that I know when my debts have been paid back

Work Not Completed:

- As a general user, I want to be able to send transactions out to people that I split with so that I can easily collect money owed to me (partial implementation)

Work Completion Rate:

- 2.5 User Stories completed
- 20 Ideal Work Hours completed
- Total days in Sprint: 7
- User Stories per day: 2/7 or about 0.28
- Work hours per day: 16/7 or about 2.28
