Sprint 2 Report
Product Name: Collect
Team Name: Collective
Date: 7/15/19

Actions to stop doing:
- The team should focus more on the tasks on hand rather than getting off topic, so the meeting could be more time efficient and productive.

Actions to start doing:
- The team should be consistent with meeting times. Since some members live farther than others, not everyone will meet on time.
- The team should be more organized with scheduling Scrum Meetings because each member agrees to meet on a certain day. Knowing the specifics of the meeting setting is important for the progress of the project.
- Every member of the team should contribute at least one idea or a solution to the scrum meeting

Actions to keep doing:
- The team should continue to work cooperatively in groups because we can work more effectively on a task
- The team should continue to have group meetings after TA meetings because we are able to reflect on the feedback.
- The team should continue to communicate with each other in the group chat to finish tasks in a timely manner
- The team should continue to ask questions

Work Completed:
- As a general user, I want to be able to save the virtual receipts on to a local storage, as well as display the items on the receipt in an appealing manner.
- Once the user has the virtual receipt items and a list of recipients, I want to be able to assign items to each member.
- As a general user, I want to be able to look at previous receipts that I've scanned and saved them to my phone locally.
- **For each item, I want to assign each person in the group so that I can easily keep track of debts owed to me**

Work Not Completed:
- **I want to have a high-level view of the mapping between item to person, so I can verify that the split has been computed correctly**

Work Completion Rate:
- 4 User Stories completed
- 48 Ideal Work Hours completed
- Total days in Sprint: 7
- User Stories per day: 2/7 or about 0.28
- Work hours per day: 8/7 or about 1.14
